# Portable Racks

Durable, flexible, stack-and-stow storage

Steel King Industries has been designing and manufacturing portable racks for over a quarter century. Portable racks make it easy to change from one rack layout to another to fit your work flow with no expensive installation or dismantling costs.

## Stac-King® Portable Racks

- Perfect solution for fluctuating inventories
- Highly customizable
- Provides a flexible racking layout
- Stack loads to avoid damage
- Remove columns and easily store when not in use

## Bar Racks

Handle and store 20,000 pounds or more of steel, bars, rods, tubing, flats, extrusions or other long products per rack (based on load weight and recommended 6:1 height-to-depth ratio)

- Designed to be accessed by fork lifts or overhead cranes
- Designed for stacking

## Pin Racks

This portable rack features a double-level sheet metal deck, perforated to accept drop-in "pins," allowing it to contain varying sizes.

- Ideal for steel stampings or other flat goods
- Stackable up to 10 high
- Holes on 3" centers
- 4,000 pound capacity each
- 5/8" diameter pins, with 12" usable height

## Coil Racks

- Store coil diameters up to 72"
- Capacities up to 20,000 lbs
- 4 way entry
- Move with fork lifts or crane
- Stack up to 4 high
